# About us

Vinci Play is a company bringing happiness to children all around the world. We design, manufacture and install fully safe, aesthetically pleasing and extremely attractive playgrounds. We root for beautiful and imaginative design that stimulates the child's unbridled curiosity while encouraging kids to have fun together. Nearly as many as 80 million girls and boys play joyfully on the Vinci Play devices in over 50 countries around the globe. Such a vast number of parents have placed their trust in us because every day we strive to give children what they need so much – some carefree fun in a safe and friendly environment, while our customers can enjoy extremely durable, top-quality equipment covered by an unrivalled 30-year warranty. Our professional attitude makes us a reliable business partner for those companies and institutions that are looking for a competent playground manufacturer.

We operate globally, seeking the very best solutions on a daily basis. However, we never lose sight of what is the most important – namely, the human dimension of our work. What drives us in all of that is our passion to witness children's joy in a safe, inspiring and fabulously colourful environment.

# Highest quality

## Advanced production processes

From the design, through production, all the way to shipping, the highest quality and safety of the playground are our priorities at every step of the way. In the production process, we implement only certified materials, and the multi-stage quality control system ensures that all equipment components that leave our production line meet stringent safety norms. We employ top specialists in their field who ensure a high standard of our products, reliable customer service and professional maintenance

service of the equipment. Our modern machine park and advanced production organisation facilitate 4-week order processing. We also offer products with a 7 and 14-days production time and goods that are available directly from the warehouse.

We are proud to offer children, their parents and guardians the guarantee of carefree fun and relaxation on the playground, thanks to the strict safety procedures and quality standards implemented within our company.

**SCAN TO  
SEE MORE**

## Customer service

Our Customer Service department operates guided by the highest standards of cooperation, confirmed by the ISO 9001: 2015 certificate. The employees of this department endeavour to respond to inquiries addressed to the company within the shortest time possible while meeting the expectations of even the most demanding buyers. We guarantee cooperation based on the understanding of the customer's needs and offer full support at every stage of the contract execution, during the warranty period and afterwards.

## Care for the environment

Care for the natural environment constitutes a vital aspect of our business activities. We follow the principles of sustainable development in all our undertakings, including the selection of contractors and suppliers. We hold an ISO 14001: 2015 certificate which confirms the implementation of an environmental management system.

## Standards and safety

Children's safety is of the utmost importance to us, which is why all Vinci Play equipment complies with the EN 1176 European standard. The products also hold the TÜV Rheinland certificate, which confirms their safety and high quality. Our high-end specialists support the Customer during the playground planning process to guarantee the compliance of the project with the applicable EU safety standards.

## Quality control

All the elements that make up the final Vinci Play equipment undergo a multi-phase and precise quality control to ensure that they comply with the EN 1176 standard. Our quality specialists use modern laboratory, as well as devices and measuring equipment to evaluate the quality of materials at every stage of production - from the acceptance of goods or components, through all manufacturing steps, all the way to packaging and preparation for shipment. Owing to regular controls and audits of our suppliers and contractors, we make sure that we cooperate only with verified companies.

## Steel welding

Our products are characterised by the highest quality of welds and a precise finish, which guarantees safe use and durability of our playground equipment. A team of highly-qualified welders, supported by cutting-edge welding robots, ensures high-quality connections of the steel components.

## Welding of stainless-steel tubes

The entire production process of stainless-steel tube slides is performed by highly-qualified Vinci Play employees. They design the tubes, then roll them with high precision, match all the elements of the device, and, finally, connect the components using durable and secure welds. At Vinci Play, we implement high-quality AISI 304 and AISI 316 stainless steel.

## Steel cutting, bending and shot blasting

We prepare steel with great care to obtain components shaped exactly in accordance with the equipment design requirements. The steel is cut with high precision using 2D and 3D lasers, then it is bent using modern CNC benders and, finally, it is shot blasted to achieve the desired surface smoothness and to prepare the metal elements for painting or galvanising.

## Galvanisation

We always galvanise steel components before applying powder paint. Galvanisation offers effective protection of the metal surface against corrosion caused by atmospheric conditions. We use two types of galvanisation: powder and hot dip. We store metal components galvanised with the help of both techniques, as this allows us to swiftly process orders of our customers.

## Abrasive treatment (shot blasting)

The steel used to manufacture the Vinci Play playground equipment is subjected to a shot-blasting cleaning process which allows us to obtain the proper surface, as well as even welds and edges. This ensures better paint adhesion, thus making the product even safer, more durable and even more aesthetically pleasing. We use professional shot-blasting chambers to process elements of different sizes. For hot-dip galvanised steel, we use electro-corundum shot blasting, and in the case of carbon steel, we employ shot blasting using broken cast steel shot.

## Powder coating

Our products are aesthetically pleasing and are available in a wider range of colours thanks to the modern powder coating line. We use the highest-quality, child-safe paints which hold the QUALICOAT certificate. Our powder coating process complies with strict standards for the temperature of paint heating, coating thickness and adhesion of the paint to steel elements.

## Processing ropes

We use the highest quality 16mm-thick steel ropes with polypropylene or nylon braiding for the manufacturing of climbing equipment and components, as well as for bridges and interlaces. We link them with durable fasteners made of plastic, stainless steel or aluminium. The rope elements are dimensioned, cut to the appropriate length, and then connected using hydraulic presses with a pressure of 150 tons.

## CNC

We purchase the HDPE and HPL sheets that we use for the production of our equipment from leading manufacturers around the world. This ensures that we use products of the highest-quality. The plates are machined using CNC milling plotters which guarantee precise cutting and milling. The desired shapes and millings – compatible with even the most complicated design requirements – are characterised by their high aesthetic and educational values and at the same time meet the highest standards of safe use.

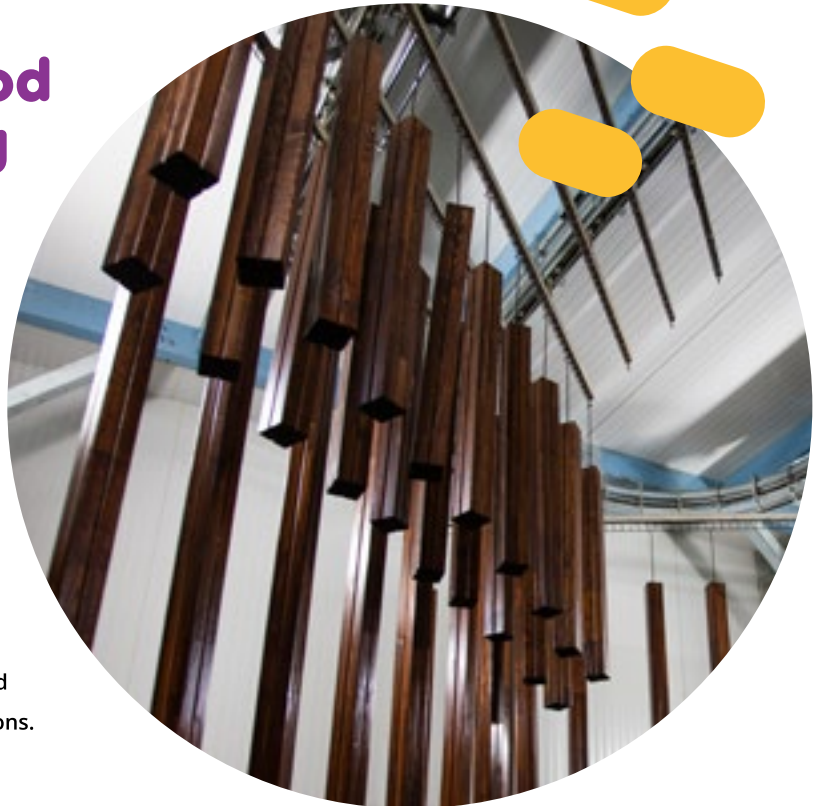

## Wood cutting

CNC saws and industrial robots precisely cut and machine the wood used for the production of wooden parts of our playground equipment. Chamfering of the wood removes any sharp edges, and four-sided surface sanding prepares the wood for the impregnation process. The high quality of wooden elements guarantees the safety of the equipment, and the automation of the process ensures short manufacturing time and fast order realization.

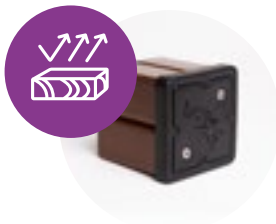

## Wood painting

For the production of our wooden equipment, we use pine wood which has been glued together in plies under pressure. The process of machining square timbers, which entails sanding, impregnation, painting, drying and hardening, takes place on a fully automated production line. The wood undergoes a multi-stage protection process, which guarantees long-term durability of the wooden parts of our equipment and make them resistant to weather conditions.

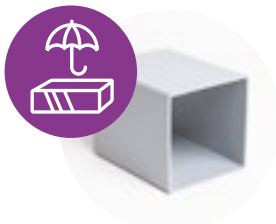

# Materials and components

## Wood

Laminated wood of pine with a cross section of 90 mm x 90 mm. Top-quality first-class wood: without knots, uniform colour, straight grain. Ground, impregnated and varnished over a multi-stage production process. Protected from top with durable plastic covers and from the bottom with hot-dip galvanised steel anchors, which secure the wood against direct contact with the ground, and thus prevent the development of rot, consequently extending its life span. The wood holds an FSC certificate.

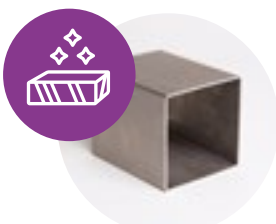

## Steel components

A steel construction of components is made of profiles with various cross-sections. It is available in the following options:

- hot-dip galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate, or
- as a steel construction: shot-blasted, iron-phosphated, powder galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate.

Available colours: ● C1 RAL 6029 ● C2 RAL 3020 ● C3 RAL 5015 ● C4 RAL 1023 ● C6 RAL 2009 ● C12 RAL 7040 ● C13 RAL 9005

## Stainless steel

An AISI 304 or AISI 316 stainless-steel construction used for the production of playground equipment, slides, tube slides, fasteners and chains. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

## HDPE

HDPE is a high-density polyethylene. It represents a high-quality material which is resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (with a black core made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

Available colours: ● red RAL 3020 ● blue RAL 5005 ● grey RAL 7040 ● black RAL 9005 ○ white RAL 9016 ● violet RAL 4008 ● green RAL 6018 ● yellow RAL 1021 ● orange RAL 2008

## HPL

HPL is a duroplastic laminate cured with polyurethane-acrylic resins, forming a highly resistant surface layer that protects against external factors. HPL sheets are resistant to chemical and biological factors, UV rays and fluctuating weather conditions. This laminate is used for the production of various types of panels, roofs and other playground components. It is PFEC-certified.

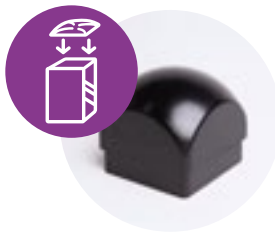

Available colours: ● red RAL 3013 ● grey RAL 7035 ● blue RAL 5025 ● blue RAL 5005 ○ white RAL 9016 ● black RAL 9005 ● orange RAL 1017 ● green RAL 6002 ● lime green ● wood

## HEXA platforms

HPL HEXA are anti-slip and waterproof platforms and climbing walls made of anti-slip HPL or, optionally, waterproof anti-slip plywood. Cross-structured plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PFEC-certified.

Available materials: HPL / Polywood

## Protective plugs

Rubber or polypropylene protective plugs protect the main construction profiles against weather conditions and children from injuries.

Available colours: ● black ● grey

## Climbing stones

Colourful climbing stones made of durable composite resin with mineral fillers; resistant to abrasion and UV radiation.

Available colours: ● yellow ● blue ● grey ● green

## Ropes

Galvanised steel ropes with a diameter of 16 mm, covered with polypropylene or nylon, connected with plastic, stainless steel or aluminium connectors, resistant to UV radiation, abrasion and rot.

Available materials and colours: ● ● ● ● Polypropylene ● Nylon

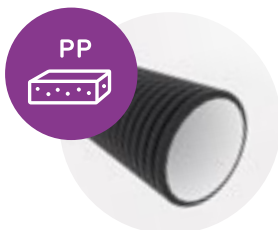

## Bolts

AISI 304 and AISI 316 stainless steel or galvanised bolts are secured against external factors by durable polyamide caps. This makes our equipment resistant to wear and tear as well as to changing weather conditions.

## Anchors

In wooden products we use hot dip galvanised anchors protecting wood against direct contact with the ground. They prevent rot, thus extend the lifespan of wooden products and ensure many years of use.

## PP tunnels

Tunnels with a double wall resistant to deformations, made of PP (diameter of 500 or 600 mm). Resistant to wear and tear, acts of vandalism and external factors.

## Spherical windows

Spherical windows made of durable polycarbonate which is resistant to physical and chemical factors.

## Chains

Certified AISI 304 and AISI 316 stainless steel chains.

## Slides

Slides are made of AISI 304 stainless steel, resistant to acts of vandalism and external factors. Our offer also includes versions made of fiberglass. The side panels of a slide are made of HDPE or HPL sheets, which are resistant to weather conditions, including frost and UV radiation.

**Available materials: Stainless steel / Fiberglass, HDPE / HPL (side panels)**

## Tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel. Sheet thickness: 2.5 mm, diameter of the slide: 790 mm, sanded surface. The length of the slide exit depends on the length of the slide itself, the exit cap is made of a pipe with a diameter of 33.7 mm. Available variants: straight, curved or spiral (360 degrees). PE versions are also available. The tube slides meet the EN 1176 Standard.

**Available materials: Stainless steel / Polyethylene**

VIDEO!**

# Guarantee

The highest quality of our products is ensured by experienced specialists and high-quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

Selected warranty periods:

**30**

30 year guarantee - Structural strength of steel and stainless steel components

**15**

15 year guarantee - Structural failure of steel and stainless steel, for dynamic equipment

**10**

10 year guarantee - Structural failure of high density polyethylene and high pressure laminates components

**5**

5 year guarantee - Corrosion of stainless steel and hot dip galvanized and powder coated components; against bark beetles and rot in case of wooden structural elements

**QUALITY  
GUARANTEED**

## 3D planner

# Design your playground!

Design a functional and safe playground with the 3D Planner application. Thanks to this user-friendly app you will be able to create several versions of the playground and choose the one you like the best in just 5 minutes. Upload a photo of the space you have at your disposal and fill it up with Vinci Play equipment. See what your new playground will look like in the morning, in the evening and during different seasons of the year. You will be able to export the created visualizations to .jpg/.png or .pdf files. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones, so that your modern playground can meet all the requirements of the EN 1176 standard.

For more information on the app's functionalities, please visit our website at [www.vinci-play.com](http://www.vinci-play.com)

# New this season

Over 100 brand-new and attractive playground structures await children this season. New products are distinguished by their unique design and modern functionalities. These safe, fun-inspiring tower constructions and themed products stimulate the imagination and are sure to provide both younger and older children with hours of carefree fun.

SCAN TO  
SEE MORE

# steel+

The STEEL + Series is primarily notable for its eye-catching aesthetics and a large number of educational, music and manipulation panels. The traditional steel tower structures, which are beloved by children, have been enriched with new elements that pose exciting challenges to the child and stimulates its comprehensive development.

New!

## Products for toddlers

The latest line of products for young children consists of completely safe themed playground equipment with many functionalities. They are distinguished by attractive handling panels, fabulous colours and an eye-catching design that will inspire the imagination of every toddler. The new products encourage children to establish relationships with their fellows and to share the fun.

## Complementary Products

Complementary products truly enrich playgrounds. They come in both modern and traditional versions, either metal or wooden, for both younger and older children. They will surely make every playground even more attractive.

# Fun for every child

A Vinci Play playground entertains, teaches and also integrates. It is crucial for us to make sure that the children who use our playground have a great time and feel happy. That is why we design multifunctional equipment which is available for every child and offers various forms of fun. A universal Vinci Play playground also offers integrative spaces where children of different ages and abilities can play together which, in turn, teaches them tolerance and cooperation within a diverse group.

8 WOODEN WD1506

# wooden

The WOODEN series is an endless source of inspiration for both younger and older children how to have fun. Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest. The environmentally friendly wooden equipment from the WOODEN series stimulates the child's comprehensive physical development and also allows a large group of kids to play together at the same time. Thanks to this, child learns how to establish relationships with their fellows and how to work as part of a team.

# solo.

The SOLO Series is a paradise for preschoolers, which is ruled by sand, water, sound and movement. Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children. The richness of colours, manual and sound elements, along with educational panels: all these elements comprehensively stimulate the senses and the intellectual development of child.

# minisweet

The MINISWEET Series consists of playground equipment designed for the youngest children and preschoolers. Friendly houses, tunnels and slides are an ideal place to have fun together. This is also where the child learns the principles of functioning in a group while perfecting its language skills. MINISWEET devices encourage children to exercise and support the development of key mobility aptitudes. They allow every toddler to enjoy joyful and carefree fun.

# climbo

The CLIMBOO Series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities. Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach the child to concentrate and maintain balance. The CLIMBOO Series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

# steel+

The STEEL+ Series comprises modern tower structures with many features that will delight both younger and older children. Colourful towers enriched with musical elements are just the perfect place to have some fun with fellow companions and are also a great spot for relaxation. A vast variety of devices with educational elements facilitate the integration of children of different fitness levels.

# steel!

The STEEL Series consists of classic structures that offer unlimited fun for older children. The sets of equipment from this series can be perfectly adapted to the needs of children and the available space. Rows of towers connected by various attractive movable elements make for a great training ground for motor coordination. They allow a large group of children to play together at the same time, which helps to establish relationships and also teaches teamwork as well as healthy competition.

# spring

The SPRING Series equals pure energy on springs. It satisfies the child's natural need for unrestrained and carefree swinging. Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements. The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

# swing

The SWING Series includes classic equipment beloved by younger and older children. Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends. Rhythmic swing movement is an effective body balancing exercise that has a positive effect on the development of the muscular and nervous system.

The CROOC Series is all about beautiful, unique designs, vibrant colours and multi-tower playground sets that allow large group to have fun together. Fairytale houses encourage children to engage in role-playing activities with their fellows. Element merging platforms, ladders, climbing walls and slides of different difficulty levels comprehensively stimulate the proper motor development of each child. The CROOC Series guarantees that the child's energy is channeled effectively.

# hoop

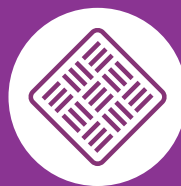

The HOOP Series consists of roundabouts and spinners which drive the world of laughing children. Spinning is an important activity for the child's development as it promotes the maturation of the nervous system, stimulates the sense of balance, strengthens the muscles and the skeletal system. At the same time it is a source of exciting sensations. For an older child, it is often a favourite place of crazy fun with friends. Colourful carousels encourage both younger and older children to have fun together.

# nettix'

The NETTIX Series comprises modern equipment in the form of ladders and rope crossings, which constitute a combination of carefree fun and effective fitness training. Rope climbing stimulates the sense of balance, strengthens the muscles and improves the child's dexterity. It also encourages children to compete with each other. The NETTIX Series is a creative adventure among ropes, where the boundaries are set only by the children's imagination.

# topicco

The TOPICCO Series consists of generously-sized colourful vehicles which have been designed with attention to detail. It includes a ship, a fire truck, a lorry and a construction roller. These vehicles release the child's natural tendency to play joyfully in the "adult" world and to engage in role-playing, which makes for a great training in teamwork skills. The TOPICCO Series offers a number of moving parts and educational panels that stimulate motor skills and intellectual development of young children.

# - park -

The PARK Series is a necessary complement to a kid-friendly playground. Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers. The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

# SPORT

The SPORT Series comprises football and hockey goals, basketball hoops and trampolines which all encourage children to take on sport challenges among their fellows. Jumping on a trampoline brings a lot of joy for every child, but it is also an effective exercise of balance, endurance and movement coordination. The equipment from the SPORT Series integrates kids while releasing the spirit of sport competition.
